

Requester Information

Department: Royal Canadian Mounted Police

Surname (Family Name): Massey

Given Name(s) (First Name): Christine

Mailing Address:

[Redacted]
Peterborough, ON
Canada

[Redacted]

Telephone No.: [Redacted]

E-mail Address: cmssyc@gmail.com

Requesting information on your own behalf? Yes

Category of Requester: Media

Right of Access: Canadian citizen

Method of Delivery: electronic copy

Modify

Act & Record Selection

Act: Access to Information Act

Does this request include personal information about you or an individual you are representing? No

Details on information being sought:

- All studies/reports in possession, custody or control of RCMP describing purification of "COVID-19 virus" (aka "SARS-COV-2", including any alleged "variants") (ie: via filtration, ultracentrifugation and chromatography) directly from a sample taken from a diseased human where the patient sample was not first combined with any other source of genetic material. Please note that I am not requesting studies/reports where researchers failed to purify the suspected "virus" and instead: -cultured something, and/or -performed an amplification test (i.e. a PCR test), and/or -fabricated a "genome", and/or -produced electron microscopy images of unpurified things. I am aware that according to virus theory a "virus" requires host cells in order to replicate and am not requesting records describing replication of a "virus" without host cells, or private patient records, but simply records that describe purification (separation from everything else in the patient sample, as per standard

Thu, Oct 28, 2021 at 4:21 PM

Dear Ms. Massey:

This is in response to your request under the Access to Information Act, which was received by this office on October 26, 2021, for:

All studies/reports in possession, custody or control of RCMP describing purification of "COVID-19 virus?? (aka "SARS-COV-2??, including any alleged "variants") (ie: via filtration, ultracentrifugation and chromatography) directly from a sample taken from a diseased human where the patient sample was not first combined with any other source of genetic material. Please note that I am not requesting studies/reports where researchers failed to purify the suspected "virus" and instead: -cultured something, and/or -performed an amplification test (i.e. a PCR test), and/or -fabricated a "genome", and/or -produced electron microscopy images of unpurified things. I am aware that according to virus theory a "virus" requires host cells in order to replicate and am not requesting records describing replication of a "virus" without host cells, or private patient records, but simply records that describe purification (separation from everything else in the patient sample, as per standard laboratory practices for the purification of other very small things). My request includes any such study/report authored by anyone, anywhere. If any records match the above description of requested records and are currently available to the public elsewhere, please provide enough information about each record so that I may identify and access each one with certainty (i.e. title, author(s), date, journal, where the public may access it) with URLs where possible.

In order to process your request we require additional information:

- **Location:** Provide a specific location (city and/or detachment) you wish to have searched. The RCMP has numerous autonomous units and in many instances the investigative information is strictly available from the unit conducting the investigation.
- **Timeframe:** Please specify a timeframe (start and end date) for the records you are seeking.

You may send this to the undersigned via e-mail.

Your file will remain open in our office for the next 30 days. If we have not received a response by **November 29, 2021**, this file will be closed.

Please be advised that you are entitled to lodge a complaint with the Information Commissioner concerning the processing of your request within 60 days of receipt of this notice. In the event you decide to avail yourself of this right, your notice of complaint should be addressed to:

Office of the Information Commissioner of Canada
30 Victoria Street, 7th Floor
Gatineau, Quebec K1A 1H3

<https://www.oic-ci.gc.ca/en/submitting-complaint>

Should you wish to discuss this matter further, please contact the undersigned at ATIPB@rcmp-grc.gc.ca. Please quote the file number appearing on this letter.

Regards,

Ms. Shideh Saebnoori-Zhang

To: ATIPB <ATIPB@rcmp-grc.gc.ca>

Dear Ms. Saebnoori-Zhang,

Re: **Location**: I have no idea how the RCMP's records are organized, and I have zero insight into where the requested records might be located and no idea how the public could be expected to know such things, nor am I required to under the legislation. However I request that you begin by asking **Brenda Lucki, RCMP Commissioner** since she has made the following claim:

"Choosing to ignore mandatory isolation and quarantine orders is not only against the law, it's also putting citizens, first responders, health professionals and the most vulnerable at risk of exposure to the virus. Collectively, everyone in Canada has a role to play to ensure compliance with isolation and physical distancing measures."

Brenda Lucki, RCMP Commissioner

<https://www.rcmp-grc.gc.ca/en/news/2020/rcmp-role-enforcing-the-federal-quarantine-act>

Please also ask **all 6 Deputy Commissioners**, and whoever is ultimately responsible for the RCMP's "COVID-19" Public Statements, Broadcasts for Employees and media releases, i.e.: <https://www.rcmp-grc.gc.ca/en/covid-19>; <https://www.rcmp-grc.gc.ca/en/news/2020/non-medical-masks-rcmp-employees>, and:

*...we can confirm that the RCMP has dealt with its first six cases of COVID-19...We are also mindful that not all persons who are COVID-19 symptomatic are tested, but that **all such members are subject to self-isolation**. As with other departments and agencies, the RCMP will continue to report to Public Health on these matters and will rely on the reporting found at canada.ca/covid19.*

<https://www.rcmp-grc.gc.ca/en/news/2020/rcmp-national-statement>

If any "autonomous units" of the RCMP are considered as separate institutions for the purposes of the Access to Information Act, please advise where the public can find contact information for their autonomous ATIP coordinators, as I am aware of no such autonomous coordinators. My request was submitted via the ATIP portal (<https://atip-airpr.tbs-sct.gc.ca/en/Home/Welcome>) and no autonomous units of the RCMP were included in the list of institutions.

Re: **Timeframe**: November 1, 2019 until the date the search is commenced.

Thank you and best wishes,
Christine

Access to Information Act Request A-2021-08921

ATIPB <ATIPB@rcmp-grc.gc.ca>
To: "cmssyc@gmail.com" <cmssyc@gmail.com>

Fri, Oct 29, 2021 at 2:33 PM

Good day Ms. Massey,

This letter is with regard to your *Access to Information Act* request received October 26, 2021 for:

All studies/reports in possession, custody or control of RCMP describing purification of "COVID-19 virus?? (aka "SARS-COV-2??, including any alleged "variants") (ie: via filtration, ultracentrifugation and chromatography) directly from a sample taken from a diseased human where the patient sample was not first combined with any other source of genetic material. Please note that I am not requesting studies/reports where researchers failed to purify the suspected "virus" and instead: -cultured something, and/or -performed an amplification test (i.e. a PCR test), and/or -fabricated a "genome", and/or -produced electron microscopy images of unpurified things. I am aware that according to virus theory a "virus" requires host cells in order to replicate and am not requesting records describing replication of a "virus" without host cells, or private patient records, but simply records that describe purification (separation from everything else in the patient sample, as per standard laboratory practices for the purification of other very small things). My request includes any such study/report authored by anyone, anywhere. If any records match the above description of requested records and are currently available to the public elsewhere, please provide enough information about each record so that I may identify and access each one with certainty (i.e. title, author(s), date, journal, where the public may access it) with URLs where possible.

A review of your request indicates that another government institution, Health Canada, has greater interest in the records in question. Your request has therefore been transferred to that institution with their agreement to process the request under *Access to Information Act*. All future correspondence and communications relating to this request should be directed to and will be received from;

Ms. Cynthia Richardson

To: ATIPB <ATIPB@rcmp-grc.gc.ca>

Thank you, but I can assure you that the information is **not** held by Health Canada. I already have 2 FOI responses from them confirming this, attached.

As of today, myself and others have obtained FOI responses from **38 Canadian institutions**; all of them are publicly available. No one has been able to provide or cite any such record.

Public Health Agency of Canada (and another from **Public Health Agency of Canada**, this one re the alleged "UK variant" aka "B.1.1.7" aka "Alpha"; and another from **Public Health Agency of Canada** re any alleged virus/variant), **Health Canada** (and another from **Health Canada**), the **National Research Council of Canada**, **Vaccine and Infectious Disease Organization-International Vaccine Centre (VIDO-InterVac)**, **Canadian Institutes of Health Research**, **Natural Sciences and Engineering Research Council of Canada**, **Public Health Ontario**, **Ontario Ministry of Health**, **Ontario Ministry of the Solicitor General and Ontario Provincial Police**, **Alberta Premier Jason Kenney, his Office and Executive Council**, **Calgary Police Service**, **Institut National de Sante Publique du Quebec** (another from **Public Health Quebec**), **British Columbia's Ministry of Health** (re "the UK variant"), **British Columbia's Centre for Disease Control**, **British Columbia's Provincial Health Services Authority** (2 responses, 1 re "SARS-COV-2", 1 re the alleged "B.1.1.7" aka "Alpha variant" aka "UK variant"), **Vancouver Coastal Health Authority** (re "B.1.1.7" aka "Alpha variant" aka "UK variant"), **Newfoundland Labrador Department of Health & Community Services**, **New Brunswick's Department/Ministry of Health**, **McGill University**, **University of Ottawa**, the **City of Toronto**, **Toronto Police** (and another from **Toronto Police**), **Halton Region**, **Hamilton Police Service** (Ontario), the **Region of Peel** (Ontario), **Region of Durham** (Ontario); **KFL&A Public Health** (Kingston, Frontenac, Lennox and Addington, Ontario, re "any variant"), **Grey Bruce Health Services**, **Grey Bruce Health Unit**, **Niagara Regional Police Service**, **Peterborough Public Health (Ontario)**, **Peterborough Police Service** (Ontario) (another from **Peterborough Police**), **Aylmer Police Service** (Ontario) (and another from **Aylmer Police**), **Hastings Prince Edward Public Health** (Ontario), the **University of Toronto**, **Sunnybrook Health Sciences Centre**, **McMaster University** and **Mount Sinai Hospital** (Toronto) (note that researchers from the last 4 institutions had publicly claimed to have "isolated the virus", as had VIDO-Intervac).

Globally we have responses from **127 institutions in over 25 countries**, all publicly available: <https://www.fluoridefreepeel.ca/fois-reveal-that-health-science-institutions-around-the-world-have-no-record-of-sars-cov-2-isolation-purification/>

Every institution has failed to provide or cite even 1 record describing the isolation aka purification of the alleged "COVID-19 virus" directly from a patient sample that was not first adulterated with other sources of genetic material. (Those other sources are typically monkey kidney aka "Vero" cells and fetal bovine serum).

And, even after culturing, virologists never purify an alleged virus and sequence it, or characterize it, or study it with controlled experiments to see if it actually spreads disease from host to host. They simply irrationally declare that they have "isolated the virus", when nothing could be further from the truth.

Without the crucial step of isolation/purification having been performed (from many patients, followed by characterization, sequencing and controlled experiments), **there is no way to claim scientifically that the alleged "novel coronavirus" actually exists.**

Without the isolation/purification step having been performed and followed by all other necessary steps, all claims of the alleged "virus" are **nothing but wild speculation backed only by fraudulent science, fraudulent tests and fraudulent diagnoses.**

Virologists do not employ the scientific method when claiming to have "isolated a virus". Instead, they starve and poison cell lines and irrationally attribute harm (that they themselves cause) to "the virus".

Their so-called "virus isolates" are in fact concoctions that they themselves created: a patient sample mixed with fetal bovine serum, a cell line (typically monkey kidney cells in the case of "SARS-COV-2") and toxic drugs. Their concoctions have never been shown to contain any "virus".

They extract all of the genetic material (RNA in the case of "SARS-COV-2") from a patient sample or from a cell culture concoction, make wild assumptions and have a computer program fabricate a so-called "genome" from millions of sequences (allegedly) detected in their concoction.

They point at electron microscopy images of particles in their cell culture concoctions and insist "that's the virus". The particles just happen to look like other known, non-viral particles and have not been shown to have originated from the patient sample. The particles are never purified, sequenced, characterized or studied with controlled experiments. They are never shown to be a disease-spreading "virus".

No one on the planet has any proof or compelling evidence for the existence of the alleged "virus". No one has a purified sample of "it".

Virology is weaponized pseudoscience.

Attached is an **EVIDENCE PACKAGE.**

The RCMP had better start investigating this and hold accountable all of the politicians and public health officials who have terrorized the public for the last 2 years over a purely theoretical, imaginary "virus", and put an end to the fraud-based kill shots and other "COVID-19" crimes against humanity.

I require that you forward this email to the OPP Commissioner.

Best wishes,
Christine Massey, M.Sc.

Dear Christine Massey,

Please note that upon reviewing your Access to Information Act request, our office realized that the Royal Canadian Mounted Police would not be the correct department to address this request based on our mandate and the wording of your request. As outlined in section 8(1) Access to Information Act and given the mandate of Health Canada, our organization reached out to Health Canada on October 29, 2021 to see if they would accept the transfer in order for them to see if they had any responsive records to your request. On October 29, 2021, Health Canada agreed to accept the transfer of this Access to Information Act request. Once the transfer was accept, our file was subsequently closed in accordance with the Access to Information Act. Any further queries should be directed to Health Canada.

Respectfully,

Megan

Dear Ms. Massey,

The following is to acknowledge receipt of your online Access to Information request, pursuant to the *Access to Information Act* (the Act), for the following information:

All studies/reports in possession, custody or control of RCMP describing purification of "COVID-19 virus (aka "SARS-COV-2, including any alleged "variants") (ie: via filtration, ultracentrifugation and chromatography) directly from a sample taken from a diseased human where the patient sample was not first combined with any other source of genetic material. Please note that I am not requesting studies/reports where researchers failed to purify the suspected "virus" and instead: -cultured something, and/or -performed an amplification test (i.e. a PCR test), and/or -fabricated a "genome", and/or -produced electron microscopy images of unpurified things. I am aware that according to virus theory a "virus" requires host cells in order to replicate and am not requesting records describing replication of a "virus" without host cells, or private patient records, but simply records that describe purification (separation from everything else in the patient sample, as per standard laboratory practices for the purification of other very small things). My request includes any such study/report authored by anyone, anywhere. If any records match the above description of requested records and are currently available to the public elsewhere, please provide enough information about each record so that I may identify and access each one with certainty (i.e. title, author(s), date, journal, where the public may access it) with URLs where possible.

This request was transferred to us in error as you clearly indicated that you were seeking records under the custody or control of the RCMP. We have already received two similar requests under your name for PHAC, one of which you have already received a response (PHAC-A-2020-000110).

I apologize for the inconvenience.

Please do not hesitate to contact me if you have any questions,

Talia Payant

Access to Information Act request A-2021-09261 Acknowledgment

ATIPB <ATIPB@rcmp-grc.gc.ca>
To: "cmssyc@gmail.com" <cmssyc@gmail.com>

Mon, Nov 8, 2021 at 2:59 PM

****Please note that in light of the current events related to COVID-19, our capacity to process requests is limited, as well, the capacity of personnel involved in the retrieval of records and/or provision of representations is similarly affected. This has an impact on our ATIP operations. Our apologies for the delay in completing your request. We thank you in advance for your considerations and understanding.**

Dear Ms. Massey:

Due to administrative error we are reopening this request and there is a new ATIP number. Please refer to the above number when contacting ATIP. This is to acknowledge receipt of your request under the *Access to Information Act*, which was received by this office on November 8, 2021, for:

All studies/reports in possession, custody or control of RCMP describing purification of "COVID-19 virus?? (aka "SARS-COV-2??, including any alleged "variants") (ie: via filtration, ultracentrifugation and chromatography) directly from a sample taken from a diseased human where the patient sample was not first combined with any other source of genetic material. Please note that I am not requesting studies/reports where researchers failed to purify the suspected "virus" and instead: -cultured something, and/or -performed an amplification test (i.e. a PCR test), and/or -fabricated a "genome", and/or -produced electron microscopy images of unpurified things. I am aware that according to virus theory a "virus" requires host cells in order to replicate and am not requesting records describing replication of a "virus" without host cells, or private patient records, but simply records that describe purification (separation from everything else in the patient sample, as per standard laboratory practices for the purification of other very small things). My request includes any such study/report authored by anyone, anywhere. If any records match the above description of requested records and are currently available to the public elsewhere, please provide enough information about each record so that I may identify and access each one with certainty (i.e. title, author(s), date, journal, where the public may access it) with URLs where possible.

We are undertaking the necessary search of our records.

The Royal Canadian Mounted Police is committed to assisting you with your request. In order to do so, an extension of 30 days beyond the 30-day statutory time limit is required. This extension is being taken in accordance with paragraph 9(1)(a) of the Act. The extension is required due to a large volume of records and because meeting the original time limit would unreasonably interfere with operations. A description of paragraph 9(1)(a) can be found at: <http://laws-lois.justice.gc.ca/eng/acts/A-1>.

Please be advised that you are entitled to lodge a complaint with the Information Commissioner concerning the processing of your request within 60 days of receipt of this notice. In the event you decide to avail yourself of this right, your notice of complaint should be addressed to:

Office of the Information Commissioner of Canada
30 Victoria Street, 7th Floor
Gatineau, Quebec K1A 1H3

<https://www.oic-ci.gc.ca/en/submitted-complaint>

Should you wish to discuss this matter further, please contact us at ATIPB@rcmp-grc.gc.ca. Please quote the file number appearing on this letter.

Regards,

November 17, 2021

Ms. Christine MASSEY

[REDACTED]
Peterborough, Ontario [REDACTED]

Dear Ms. Massey:

This is in response to your request under the *Access to Information Act*, which was received by this office on November 8, 2021, to obtain:

All studies/reports in possession, custody or control of RCMP describing purification of "COVID-19 virus?? (aka "SARS-COV-2??, including any alleged "variants") (ie: via filtration, ultracentrifugation and chromatography) directly from a sample taken from a diseased human where the patient sample was not first combined with any other source of genetic material. Please note that I am not requesting studies/reports where researchers failed to purify the suspected "virus" and instead: -cultured something, and/or -performed an amplification test (i.e. a PCR test), and/or -fabricated a "genome", and/or -produced electron microscopy images of unpurified things. I am aware that according to virus theory a "virus" requires host cells in order to replicate and am not requesting records describing replication of a "virus" without host cells, or private patient records, but simply records that describe purification (separation from everything else in the patient sample, as per standard laboratory practices for the purification of other very small things). My request includes any such study/report authored by anyone, anywhere. If any records match the above description of requested records and are currently available to the public elsewhere, please provide enough information about each record so that I may identify and access each one with certainty (i.e. title, author(s), date, journal, where the public may access it) with URLs where possible.

Based on the information provided, a search for records was conducted with our **Chief Human Resources Office and Specialized Policing Services**. Unfortunately, we were unable to locate records which respond to your request. However, you may wish to make a separate Access to Information request with Health Canada. They are located at the following address:

Cynthia Richardson
Access to Information and Privacy Coordinator
Holland Cross, Tower B
7th Floor, Suite 700, Room 741
1600 Scott Street, Address locator: 3107A
Ottawa, Ontario K1A 0K9

They can also be reached by email at: Atip-Aiprp@hc-sc.gc.ca or by phone at: 613-954-9165

The *Access to Information Act* has established the right of applicants to access federally maintained records. If this particular matter concerned another police department, they may have information of interest to you. The *Access to Information Act* does not authorize the RCMP to search files or to disclose information belonging to other police forces.

Please be advised that you are entitled to lodge a complaint with the Information Commissioner concerning the processing of your request within 60 days of receipt of this notice. In the event you decide to avail yourself of this right, your notice of complaint should be addressed to:

Office of the Information Commissioner of Canada
30 Victoria Street, 7th Floor
Gatineau, Quebec K1A 1H3

<https://www.oic-ci.gc.ca/en/submitting-complaint>

Should you wish to discuss this matter further, you may contact Ms. Megan Groh at ATIPB@rcmp-grc.gc.ca. Please quote the file number appearing on this letter.

Thu, Nov 18, 2021 at 6:39 PM

Thank you Megan.

Since the RCMP, and in fact no one on the planet (including the institutions that fraudulently claimed to have "isolated the virus"), has a shred of proof that "the virus" exists, please advice what the RCMP intends to do about this. Has an investigation been initiated? The people have been terrorized for almost 2 years now.

Best wishes,
Christine

To: Christine Massey <cmssyc@gmail.com>, ATIPB <ATIPB@rcmp-grc.gc.ca>

Good day Ms. Massey,

Thank you for your email. However, your email query is outside the mandate of RCMP ATIP. You may want to contact Health Canada to follow up on your question as it is their mandate to address this topic.
