Notice to industry: Highly pathogenic avian influenza (HPAI or H5N1) in dairy cattle in the USA - Addendum to export certificate

2024-05-01

Due to the outbreak of HPAI (H5N1) in dairy cattle in the USA, the [Canadian Food Inspection Agency \(CFIA\)](#) will require an [addendum to the export certificate of cattle imported](#) under the import policy [Requirements for Breeding Cattle Imported from the United States to Canada](#).

This will apply to export certificates issued on or after April 29, 2024, and until further notice.

The Addendum to export certificate for breeding Cattle from the United States of America (PDF) must certify that:

- the lactating dairy cows listed above have tested negative by PCR for Influenza A virus at an APHIS-approved National Animal Health Laboratory Network (NAHLN) laboratory, within 7 days of export, on (insert date)

May 10, 2023: "experts" at Canadian Food Inspection Agency (CFIA) confessed in a freedom of information (FOI) response to having zero scientific proof of the existence of any alleged "virus" ever claimed to have affected livestock in Canada (see FOI response A2022-00201 / MD [here](#)).

CFIA is now the "lead agency" in **Canada** on the supposed "**H5N1**" health threat.

May 9, 2024: I filed a follow-up **request** for all studies in the possession, custody or control of CFIA, authored by anyone, anywhere, since May 10, 2023 or obtained by CFIA since May 10, 2023:

- that scientifically prove/provide evidence of the existence of the alleged "H5N1"

and all studies and/or reports in the possession, custody or control of CFIA authored by anyone, anywhere, **ever**:

- that describe purification of particles that are alleged to be "H5N1" directly from bodily fluid/tissue/excrement of "hosts" (without adding any sources of genetic material or proteins), and/or
- wherein the purported "genome" of this alleged "virus" was found intact (as opposed to fabricated in silico), and/or
- that scientifically demonstrate contagion of the illness / symptoms that are allegedly caused by said purported "virus".

June 6, 2024: "Joannis, Helen, Acting Team Leader Access to Information and Privacy" responded ([pg 10](#)):

"Your request involves a large number of records or necessitates a search through a large number of records and **meeting the original time limit would unreasonably interfere with the operations of the Agency. We are therefore taking a time extension of up to 30 days**, as defined in paragraph 9(1)(a) of the Act, to complete the processing of your request. **The revised due date is July 9, 2024.**" 😊

"Fragments" are declared to be "viral" in origin based on zero valid scientific evidence:

Commercial milk sampling and testing for highly pathogenic avian influenza (HPAI) viral fragments in Canada

As part of the Government of Canada's [One Health](#) approach, the Canadian Food Inspection Agency (CFIA) in collaboration with the Public Health Agency of Canada (PHAC) and Health Canada is taking [proactive measures](#) to monitor Canadian dairy cows for HPAI.

Commercially sold milk and milk products remain safe to consume. In Canada, milk must be pasteurized before sale. The pasteurization process kills harmful bacteria and viruses, including HPAI, ensuring milk and milk products are safe to drink and eat.

We conducted testing of milk at the retail level to look for viral fragments of HPAI. CFIA laboratories tested commercial milk samples from across Canada using a type of polymerase chain reaction (PCR) test. The method used to test milk for HPAI is very sensitive and is able to detect fragments of the virus, even if the virus is not infectious.

Negative results mean that HPAI fragments are not present in milk. This supports current reports that the virus has not been detected in Canadian dairy cows.

CFIA is part of the "health portfolio" of the man who acts as "The Honourable Mark Holland" and "Minister of Health".

All of the other agencies in Mark's (investment) portfolio have also been challenged via FOI requests and shown that they are unable to cite any valid scientific evidence of "SARS-COV-2" or any other alleged "virus" that they've been asked about.

Here is one of the dozens and dozens of Dun and Bradstreet entries that come up in a search for "Canadian Food Inspection Agency".

The screenshot shows the Dun & Bradstreet profile for the Canadian Food Inspection Agency. The 'Company Description' field is highlighted with a red box. A red arrow points from the word "Scientific" to the 'Industry' field, which lists "Other Professional, Scientific, and Technical Services". Other fields include 'Key Principal: Sylvie Whitehead', 'Address: 103-10 Queen St Fort Erie, ON, L2A 6M4 Canada', 'Phone', and 'Website: inspection.canada.ca'.

For truth, freedom and sanity,
Christine
