In December 2020 I filed an FOI request to "**Public Services and Procurement Canada**" relating to **Pfizer's covid-1984 injections** that are fraudulently passed off as "vaccines" (see pg 11 for the request wording). **Records** were finally provided in March, 3.25 years later.

August 12, 2022:

Dr. Kyle Wilson acting as as Director, Information Systems & Chief Privacy Officer, **Wellington-Dufferin-Guelph Public Health, Ontario Canada** confessed that Nicola Mercer acting as Medical Officer of Health and CEO, Matthew Tenenbaum acting as Associate Medical Officer of Health, David Kingma acting as Director, Administrative Services, Camille Loucks acting as Manager, Clinical Services, Karen Mulvey acting as Manager, Vaccine Preventable Diseases, Lillianna Marinko acting as Manager, Control of Infectious Disease and the health unit have **no record of any alleged "monkeypox virus" being found in the bodily fluid/tissue of any so-called "host" and purified, by anyone, anywhere, ever**…. despite this being a preliminary step required to scientifically show the existence of a "virus" and despite their **monkeypox fear-mongering** and despite their offering of a **monkeypox quackcine** (**pg 8**).

***

Last year, a colleague FOI'd **Niagara County Department of Health, New York** for all scientific studies, reports and/or white papers held by the institution that describe **isolation/purification of the alleged "SARS-COV-2"** from human beings and **inducement of "covid" in a healthy person** using said purified particles. (Yes, we know that experiments of this nature would normally not be done on people, however there has been at least 1 **fake/fraudulent "SARS-COV-2 human challenge"** published).

On February 10, 2023 Daniel J. Stapleton acting as "Public Health Director" confessed (**pg 3**) "***we have no information responsive to this request***".

In March 2024, I filed an FOI request to the "experts" at **Kingston, Frontenac and Lennox & Addington (KFL&A) Public Health (Ontario)** for all studies/records, authored by anyone anywhere, in their possession, custody or control, that meet the descriptions listed further below - because some of the people there who act as "Board of Health Member", "Councillor", "**public health promoter**" etc. are openly conspiring to add toxic waste fluoride acid to other people's drinking water. On April 15, 2024 Suzette Taggart acting as "PHIPA / MFIPPA Officer" provided her response.

Regarding records that scientifically prove/provide evidence that drinking water that has been fluoridated - with the typical water fluoridation agent, hydrofluorosilicic acid (HFSA), that eats through concrete, is contaminated with toxins that have no known safe level (i.e. arsenic, lead) and spilled on highway 401 in 2017 in a **deadly accident** that sent many first-responders to hospital - is safe **for everyone** and effective **for everyone** at reducing dental caries, as claimed:

Suzette responded with irrelevant, distracting claims and propaganda before confessing that the "experts" at KFL&A have **zero primary studies** and rely instead on misleading reviews. Reviews do not adhere to the scientific method or provide full details of the methods employed in the reviewed studies, and therefore make it easy to bamboozle the public when promoting a dangerous/deadly "public health" agenda like fluoridation. Cherry-picking and limiting the scope of a review to human studies (despite the fact that toxicology studies are not carried out on humans) and to studies of fluoride in water (as if all other F studies are irrelevant) are the norm. Naturally Suzette cited an infamous (and possibly "AI") **report** from **the anonymous fakers** at "Canadian Agency for Drugs and Technologies in Health" (CADTH) (**pg 12**).

> Finally, systematic reviews are not individual studies and as such, we do not have individual studies that meet your request. However, we have attached references below for the systematic reviews in our possession:

Regarding studies proving that the actual HFSA product (which is not pure HFSA) - that criminals in Kingston might add to other people's drinking water - dissociates 100% in actual tap water (which is not pure H20), Suzette repeated propaganda that is not supported by any valid scientific evidence and responded as though she didn't understand what I had actually asked for… instead of simply admitting "no records" (**pg 13**).

> **Request Part 2**: All records in the possession, custody or control of the institution that prove that the actual HFSA product (which is not pure HFSA) that might be added to public drinking water under the advisement of the people acting as "the Board of Health" dissociates 100% in local tap water (which is not pure H20).
>
> **Response Part 2:**Hydrofluorosilicic acid (HFSA) is an additive used in community water fluoridation. Community water fluoridation is a safe and effective measure to prevent tooth decay, regardless of the fluoride additive used. Scientific evidence has focused on the health effects of treated water rather than the health effects of concentrated additives. See list of systematic reviews above.

Regarding all other studies/records relating to the local agenda/conspiracy to mass drug and experiment on innocent, unsuspecting people via their drinking water, Suzette provided evidence in the form of a memo from Susan Stewart acting as “Director” and Sarah Donnelly acting as “Manager” urging members of the “Board of Health” to move forward with the scam, and a letter from Wess Garrod acting as “Board of Health Chair” urging the people who act as “Mayor” and “City of Kingston Councillors” to do the same (**pgs 14-22**).
