July 29, 2024:

Sarah B. Kotler ("J.D.") acting as Director, Division of Freedom of Information, confessed that the **US Food and Drug Administration (FDA)** has no records authored by anyone, anywhere:

1. that scientifically prove/provide evidence of the existence of any alleged "**avian influenza virus**",
2. that describe the **purification of particles** that are alleged to be "avian influenza virus" directly from bodily fluid/tissue/excrement of so-called "hosts",
3. wherein the **purported "genome" of any alleged "avian influenza virus" was found intact** in the bodily fluid/tissue/excrement of a "host" (as opposed to fabricated in silico, aka a computer model), or
4. that **scientifically demonstrate contagion** of the illness / symptoms that are allegedly caused by purported "avian influenza viruses"...

Dear Requester,

I am writing in response to your request for:

All studies in the possession/custody/control of the FDA, authored by anyone, anywhere: 1. - that scientifically prove/provide evidence of the existence of any alleged "avian influenza virus" (showing that the alleged particles exist, invade and replicate in "host" cells and cause the illness/symptoms that they are alleged to cause). Note: Scientific proof/evidence is not opinions, speculation, declarations, review papers or descriptive studies. Scientific evidence requires use of the scientific method to test falsifiable hypotheses through valid, rigorous, repeatable controlled experiments. 2. - that describe the purification of particles that are alleged to be "avian influenza virus" directly from bodily fluid/tissue/excrement of so-called "hosts" (without adding any sources of genetic material or proteins), with purification confirmed via EM imaging (the images must be available as well). Purify = separate from everything else in the clinical sample. I am aware that according to "virus" dogma a "virus" requires host cells in order to replicate. I am not seeking records describing the replication of a "virus" without host cells or that describe a suspected "virus" floating in a vacuum or a strict fulfillment of Koch's Postulates. I am simply seeking records that describe purification (separation from everything else in the "host" sample). I am not seeking private patient records. 3. - wherein the purported "genome" of any alleged "avian influenza virus" was found intact in the bodily fluid/tissue/excrement of a "host" (as opposed to fabricated in silico, aka a computer model). 4. - that scientifically demonstrate contagion of the illness / symptoms that are allegedly caused by purported "avian influenza viruses". If any records match the above description and are publicly available, please provide enough information about each one so that I may identify and access it with certainty (i.e. title, author(s), date, journal, URL, DOI). Send via email.

The FDA does not regulate or treat viruses. The FDA is responsible for protecting the public health by ensuring the safety, efficacy, and security of human and veterinary drugs, biological products, and medical devices; and by ensuring the safety of our nation's food supply, cosmetics, and products that emit radiation. Therefore, we have no responsive records. If you are interested, we have already made information public regarding the milk supply (Updates on Highly Pathogenic Avian Influenza (HPAI) | FDA) and the process for approval of Avian Influenza test kits. (Influenza Diagnostic Tests | FDA).

In accordance with 45 CFR § 5.61 and 21 CFR § 20.41(b)(5), you have the right to appeal this determination. Your appeal should clearly identify the agency determination that is being appealed. It would be helpful if you provide specific reasons explaining why you believe the agency's adverse determination should be reconsidered. By filing an appeal, you preserve your rights under FOIA.

... despite the "experts" at FDA:

- giving "Updates on Highly Pathogenic Avian Influenza"

- "announcing results from a first-of-its-kind study ... The intention of this study was to further confirm that pasteurization is effective at inactivating Highly Pathogenic H5N1 Avian Influenza (H5N1 HPAI) virus in fluid milk and other dairy products made from pasteurized milk"

- claiming to "continue to investigate an outbreak of highly pathogenic avian influenza (HPAI) virus impacting dairy cows in multiple states"

- posting "H5N1 HPAI" "Testing Results"

<https://www.fda.gov/food/alerts-advisories-safety-information/updates-highly-pathogenic-avian-influenza-hpai#background>

and

- posing as an authority on tests for the imaginary "Highly Pathogenic Avian Influenza"

<https://www.fda.gov/medical-devices/in-vitro-diagnostics/influenza-diagnostic-tests>

Apparently logic isn't Sarah's thing, because she wrote (pg 12):

“The FDA does not regulate or treat viruses. The FDA is responsible for protecting the public health by ensuring the safety, efficacy, and security of human and veterinary drugs, biological products, and medical devices; and by ensuring the safety of our nation's food supply, cosmetics, and products that emit radiation. Therefore, we have no responsive records.”

Because "they" (HIV, influenza virus, HPV, measles virus, etc., etc., etc.) have never been shown to exist, clearly don't exist and virology isn't a science.
