## FDA officially admits: we have zero scientific evidence of any virus of the Poxviridae family... or contagion... or even a genome

To expand upon our massive **FOI evidence-base** for never-shown-to-exist pox viruses and viruses in general, on November 19, 2024 I filed an order with the **US Food and Drug Administration (FDA)** for all studies in the possession/custody/control of the institution, **authored by anyone, anywhere, since January 1, 1900:**

1. that scientifically **prove/provide evidence of the existence of any alleged virus of the "Poxviridae family"** (showing that the alleged particles with a specific "genome" and proteins exist and cause the illness/symptoms that they are alleged to cause),
2. or, that even describe **purification of particles** claimed to be any of said alleged viruses directly from bodily fluid/tissue/excrement of so-called "hosts" with purification confirmed via EM images,
3. or, wherein the purported **"genome" of any of these alleged viruses was found intact** in the bodily fluid/tissue/excrement of a so-called "host" (as opposed to fabricated/assembled in silico, aka a computer model),
4. or, that **scientifically demonstrate contagion** of any of the illnesses allegedly caused by any of these alleged viruses.

November 29, 2024:

Despite the fact that I had made things overly-easy for the "experts" by not requiring them to provide evidence that the purported particles hijack cells and replicate...

Sarah B. Kotler ("J.D.") acting as Director, Division of Headquarters Freedom of Information, Office of Management and Enterprise Services, Office of the Commissioner, US Food & Drug Administration confessed in an email ("**2024-10300**") and an attached letter (**pgs 4-7**) that the "experts" at FDA have no records whatsoever matching my order... authored by anyone, anywhere, since January 1, 1900:

Dear Requester,

I am writing in response to your request for:

All studies in the possession/custody/control of the FDA, authored by anyone, anywhere: 1. - that scientifically prove/provide evidence of the existence of any alleged virus of the "Poxviridae family" (showing at minimum that the alleged particles with a specific "genome" and proteins exist and cause the illness/symptoms that they are alleged to cause) Note: Scientific proof/evidence is not opinions, speculation, declarations, review papers or descriptive studies. Scientific evidence requires use of the scientific method to test falsifiable hypotheses through valid, rigorous, repeatable controlled experiments. 2. - or, that even describe purification of particles claimed to be any of said alleged viruses directly from bodily fluid/tissue/excrement of so-called "hosts" (without adding any sources of genetic material or proteins) with purification confirmed via EM images (the images must be available as well) Purify = separate from everything else in the clinical sample. I am aware that according to "virus" dogma a "virus" requires host cells in order to replicate and am not seeking records describing the replication of a "virus" without "host" cells, or that describe a suspected "virus" floating in a vacuum or a strict fulfillment of Koch's Postulates. I am simply seeking records that describe purification (separation from everything else in the "host" sample). I am not seeking private patient records. 3. - or, wherein the purported "genome" of any of these alleged viruses was found intact in the bodily fluid/tissue/excrement of a so-called "host" (as opposed to fabricated/assembled in silico, aka a computer model) 4. - or, that scientifically demonstrate contagion of any of the illnesses allegedly caused by any of these alleged viruses. Send via email. I do not agree to this order or "personal information" being shared with 3rd parties including those that provide FOIA services, without my explicit written consent.

The FDA does not regulate or treat viruses. The FDA is responsible for protecting the public health by ensuring the safety, efficacy, and security of human and veterinary drugs, biological products, and medical devices; and by ensuring the safety of our nation's food supply, cosmetics, and products that emit radiation. Therefore we have no responsive records. If you are interested, the NIH has information about this topic at: [Poxviruses - Medical Microbiology - NCBI Bookshelf](#).

In accordance with 45 CFR § 5.61 and 21 CFR § 20.41(b)(5), you have the right to appeal this determination. Your appeal should clearly identify the agency determination that is being appealed. It would be helpful if you provide specific reasons explaining why you believe the agency's adverse determination should be reconsidered. By filing an appeal, you preserve your rights under FOIA and give the agency a chance to review and reconsider your request and the agency's decision. Your appeal must be mailed within 90 days from the date of this response, to: Director, Office of the Executive Secretariat, U.S. Food & Drug Administration, 5630 Fishers Lane, Room 1050, Rockville, MD 20857, or emailed within 90 days from the date of this response to [FDAFOIA@fda.hhs.gov](mailto:FDAFOIA@fda.hhs.gov). Please clearly mark both the envelope

Dear Requester:

The Food and Drug Administration (FDA) has received your Freedom of Information Act (FOIA) request for records regarding:

All studies in the possession/custody/control of the FDA, authored by anyone, anywhere: 1. - that scientifically prove/provide evidence of the existence of any alleged "HPV" aka "Human Papillomavirus" (showing that the alleged particles exist and cause the illness/symptoms that they are alleged to cause). Note: Scientific proof/evidence is not opinions, speculation, declarations, review papers or descriptive studies. Scientific evidence requires use of the scientific method to test falsifiable hypotheses through valid, rigorous, repeatable controlled experiments. 2. - that describe the purification of particles that are alleged to be "HPV" directly from bodily fluid/tissue/excrement of so-called "hosts" (without adding any sources of genetic material or proteins), with purification confirmed via EM imaging (the images must be available as well). Purify = separate from everything else in the clinical sample. I am aware that according to "virus" dogma a "virus" requires host cells in order to replicate and am not seeking records describing the replication of a "virus" without host cells, or that describe a suspected "virus" floating in a vacuum or a strict fulfillment of Koch's Postulates. I am simply seeking records that describe purification (separation from everything else in the "host" sample). I am not seeking private patient records. 3. - wherein the purported "genome" of any alleged "HPV" was found intact in the bodily fluid/tissue/excrement of a "host" (as opposed to fabricated in silico, aka a computer model). 4. - that scientifically demonstrate contagion of the illness / symptoms that are allegedly caused by purported "HPV". If any records match the above description and are publicly available, please provide enough information about each one so that I may identify and access it with certainty (i.e. title, author(s), date, journal, URL, DOI). Send via email.
