Culpable homicide is murder. Life in prison.

On August 29, 2024 I filed an order ([pg 1](#)) with the US Food and Drug Administration (FDA) for all studies **authored by anyone, anywhere** in the possession/custody/control of the institution:

1. - that **scientifically prove or provide evidence of the existence of any alleged "HPV"** aka "Human Papillomavirus" (showing that the alleged particles exist and cause the illness/symptoms that they are alleged to cause)
2. - that describe the **purification of particles that are alleged to be "HPV" directly from bodily fluid/tissue/excrement** of so-called "hosts" (without adding any sources of genetic material or proteins)
3. - wherein the **purported "genome" of any alleged "HPV" was found intact** in the bodily fluid/tissue/excrement of a "host" (as opposed to fabricated in silico aka made-up / modelled on a computer)
4. - that **scientifically demonstrate contagion** of the illness / symptoms that are allegedly caused by purported "HPVs".

Note that I made it easy on them by not requiring any evidence that the alleged particles hijack cells and replicate. And as usual, I asked that if any records match the above descriptions and are currently available to the public elsewhere, I be provided enough information about each one so that I may identify and access it (titles, authors, etc.).

I also selected the "expedited processing" option based on "danger to human life", given the fact that young people will continue being injected with dangerous ingredients based on the premise of a never-shown-to-exist "virus".

The next day I received an acknowledgement letter ([pg 4](#)) from Sarah B. Kotler ("J.D.") who acts as Director, Division of Headquarters Freedom of Information, Office of Management and Enterprise Services, Office of the Commissioner, US FDA stating:

"We will respond as soon as possible..."

Three months later, I had not received a response and so on November 30, 2024 I followed up with Sarah ([pg 6](#)).

I've been waiting over 4 months for the response. Kindly send it in a letter, signed with Sarah's proper name.

This time Sarah responded ([pg 8](#)). She falsely claimed that I had acknowledged receipt of the FDA's response. She also claimed not to know why I had made a reference to her "proper name".

You have acknowledged receipt of our response. I am not clear on what you mean by "Sarah's proper name." My signature information is below and includes my full proper name.

Sarah B. Kotler, J.D.

Director, Division of Headquarters Freedom of Information

I corrected Sarah that same day, pointing out that I had only acknowledged her **unsigned acknowledgement letter** and was still waiting for her official "no records" confession. I also pointed out issues with her "digital signatures" on responses to other imaginary-virus FOI responses, and let her know that the longer she stalls the worse it looks and the longer she might spend in jail for culpable homicide aka murder ([pg 9](#)).

Correction:

I acknowledged your **unsigned acknowledgement letter that stated "We will respond as soon as possible..."**, not your legal confession that "the experts" at FDA have zero scientific evidence of the imaginary HPV or even the imaginary HPV "genome" and no scientific evidence that the symptoms purportedly caused by the imaginary virus are contagious - because you have not supplied said confession yet.

In your Poxviridae confession (published [here](#) and attached) you "digitally signed" as "Sarah B. Kotler -S".

You did the same in your "SARS-COV-2" confession, attached and published [here](#).

You did the same in your "monkeypox virus" confession, attached and published [here](#) (and you ignored all of my questions).

You provided your "avian influenza virus" confession as an email without even a "digital signature", attached and published [here](#).

I will publish an article about this request in the next week, with or without your final response.

The longer you stall, the worse it looks and the longer you might spend in jail for fraud, culpable homicide = murder, etc.

Christine

Sarah then claimed that a response had already been sent to me (pg 10), while ignoring the issues with her past “digital signatures” (emphasis added, below).

“Pursuant to 45 CFR 5.28(a), “we will send you a response **informing you of our release determination, including whether any responsive records were located, how much responsive material was located, whether the records are being released in full or withheld in full**” ... We have done that. Your request is closed. Are you saying you did not receive the response? If that is the case, I can send you another one.”

 [Quoted text hidden]

Sarah immediately followed up with an email that looked like a response, but lacked an actual response (pgs 13/14). Her email did not inform me “whether any responsive records were located, how much responsive material was located, whether the records are being released in full or withheld in full” - despite indicating in her earlier email that such is required under 45 CFR 5.28(a).

Instead, Sarah’s email contained irrelevant, false and misleading statements implying that viruses are known to exist and that the FDA actually protects people and ensures safety and efficacy of the products that it approves or authorizes.

FDA FOIA 2024-7649

Dear Requester,

I am writing in response to your request for:

All studies in the possession/custody/control of the FDA, authored by anyone, anywhere: 1. - that scientifically prove/provide evidence of the existence of any alleged "HPV" aka "Human Papillomavirus" (showing that the alleged particles exist and cause the illness/symptoms that they are alleged to cause). Note: Scientific proof/evidence is not opinions, speculation, declarations, review papers or descriptive studies. Scientific evidence requires use of the scientific method to test falsifiable hypotheses through valid, rigorous, repeatable controlled experiments. 2. - that describe the purification of particles that are alleged to be "HPV" directly from bodily fluid/tissue/excrement of so-called "hosts" (without adding any sources of genetic material or proteins), with purification confirmed via EM imaging (the images must be available as well). Purify = separate from everything else in the clinical sample. I am aware that according to "virus" dogma a "virus" requires host cells in order to replicate and am not seeking records describing the replication of a "virus" without host cells, or that describe a suspected "virus" floating in a vacuum or a strict fulfillment of Koch's Postulates. I am simply seeking records that describe purification (separation from everything else in the "host" sample). I am not seeking private patient records. 3. - wherein the purported "genome" of any alleged "HPV" was found intact in the bodily fluid/tissue/excrement of a "host" (as opposed to fabricated in silico, aka a computer model). 4. - that scientifically demonstrate contagion of the illness / symptoms that are allegedly caused by purported "HPV". If any records match the above description and are publicly available, please provide enough information about each one so that I may identify and access it with certainty (i.e. title, author(s), date, journal, URL, DOI). Send via email.

The FDA does not regulate or treat viruses. The FDA is responsible for protecting the public health by ensuring the safety, efficacy, and security of human and veterinary drugs, biological products, and medical devices; and by ensuring the safety of our nation's food supply, cosmetics, and products that emit radiation. For general information on HPV, please see: [HPV \(human papillomavirus\) | FDA](#).

In accordance with 45 CFR § 5.61 and 21 CFR § 20.41(b)(5), you have the right to appeal this determination. Your appeal should clearly identify the agency determination that is being appealed. It would be helpful if you provide specific reasons explaining why you believe the agency's adverse determination should be reconsidered. By filing an appeal, you preserve your rights under FOIA and give the agency a chance to review and reconsider your request and the agency's decision. Your appeal must be mailed within 90 days from the date of this response, to: Director, Office of the Executive Secretariat, U.S. Food & Drug Administration, 5630 Fishers Lane, Room 1050, Rockville, MD 20857, or emailed within 90 days from the date of this response to FDAFOIA@fda.hhs.gov. Please clearly mark both the envelope and your letter "FDA Freedom of Information Act Appeal." Items arriving or delivered after 5 p.m. Eastern Time will be deemed received on the next workday.

If you would like to discuss our response before filing an appeal to attempt to resolve your dispute without going through the appeals process, please contact me at 301-796-8976 or Sarah.Kotler@fda.hhs.gov.

Please contact me if you have questions about your request. You may also contact the FDA FOIA Public Liaison for assistance at: Office of the Executive Secretariat, US Food & Drug Administration, 5630 Fishers Lane, Room 1050, Rockville, MD 20857, E-mail: FDAFOIA@fda.hhs.gov.

If you are unable to resolve your FOIA dispute through our FOIA Public Liaison, the Office of Government Information Services (OGIS), the Federal FOIA Ombudsman's office, offers mediation services to help resolve disputes between FOIA

requesters and Federal agencies. The contact information for OGIS is as follows: Office of Government Information Services, National Archives and Records Administration, 8601 Adelphi Road—OGIS, College Park, MD 20740-6001; telephone at 202-741-5770; toll free at 1-877-684-6448; or facsimile at 202-741-5769; e-mail at ogis@nara.gov.

Sincerely,

Thank you but I don't see any information in that email regarding "release determination, including whether any responsive records were located, how much responsive material was located, whether the records are being released in full or withheld in full or in part". It does not address my FOIA order.

And these comments are irrelevant, false and misleading so kindly remove them:

"The FDA does not regulate or treat viruses." - No one can regulate or treat alleged viruses because they have never been shown to exist. Both the literature and literally hundreds of FOI responses from 40 different countries confirm this (as shown at the links below and in [my notarized affidavit](#), attached).

"The FDA is responsible for protecting the public health by ensuring the safety, efficacy, and security of human and veterinary drugs, biological products, and medical devices; and by ensuring the safety of our nation's food supply, cosmetics, and products that emit radiation." - The FDA rubber stamps poisons like quackcines and is complicit in pseudoscience and deadly fraud. The nation's food supply is largely contaminated with filth of various sorts.

"For general information on HVP, please see: [HPV \(human papillomavirus\) | FDA](#)." - There is no information about any alleged virus, only mis- and dis-information about imaginary viruses. No virus has ever been shown to exist.

The whole point of my FOIA orders has been to give "the experts" the chance to prove that no-virus people are wrong. "The experts" at FDA have failed in every instance, just like "the experts" at every other institution that was challenged.

Christine

Sarah then backtracked and contradicted her earlier claim of having already sent me a response and her theatrical performance of re-sending a response. She now asserted that "**we consider your request misdirected**" ([pg 16](#)). She also confessed, **not for the first time**, that:

"It is not something that FDA would have records about. You may want to consider submitting to CDC."

We consider your request misdirected. It is not something that FDA would have records about. You may want to consider submitting to CDC. You are also welcome to appeal, contact the FOIA Public Liaison, or contact OGIS.

[Quoted text hidden]

Anyone familiar with this FOI project knows that the CDC has already been **FOI'd** on HPV, SARS-COV-2 and dozens of other imaginary viruses and that they failed to provide a shred of valid scientific evidence every single time (because none exists). This had already been pointed out to Sarah (i.e. [pg 12 here](#)).

And as Sarah knows full well, the FDA itself has failed **every virus-challenge** put to it (SARS-COV-2, avian influenza virus, monkeypox virus, any virus of the Poxviridae family).

So I called Sarah out on her latest deflection, which amounts to a refusal to respond to the FOIA order.

Sarah has made it clear for everyone to see: she knows perfectly well that no one at the FDA can provide or cite any valid scientific evidence showing the existence of any alleged virus or viral genome or "viral" anything or contagion.

This makes it impossible for the "experts" at FDA to evaluate any test, quackcine or other intervention that supposedly relates to an alleged virus or viral illness. They are fakers, and their fraudulent rubber-stamping of products is just part of the murderous state-sponsored theatre.

Everyone can draw their own conclusions as to how much prison time is appropriate for the lawyers, politicians, business people, pseudoscientists, etc. who are complicit in deadly "germ" hoaxes.

To: "Kotler, Sarah" <Sarah.Kotler@fda.hhs.gov>

Cc: "FDA_FOI@fda.gov" <FDA_FOI@fda.gov>, FDA FOIA <FDAFOIA@fda.hhs.gov>

So now you admit that you willfully chose not to provide a response (because there is no valid scientific evidence for you to provide or cite, and "the experts" and others, including yourself, at FDA are complicit in a massive deadly hoax), apparently in violation of 45 CFR 5.28(a). You could have just admitted that from the outset, instead of pretending that you had already sent a response, and then sending me a no-response fake-response.

There is nothing "misdirected" about challenging fake-experts and fake-authorities to provide or cite valid scientific evidence to back up their deadly, fraud-based hoaxes.

As explained to you in the past and in my affidavit, the CDC has already been formally challenged on dozens of alleged viruses, and they also failed to provide or cite even a shred of valid scientific evidence for any of them, or even a "genome" or contagion of symptoms.

I will not waste my time on an appeal since your last email already made it clear for everyone to see: **you know perfectly well** that no one at the FDA can provide or cite any valid evidence of any alleged virus or "viral genome" or "viral" anything or contagion. The fraudulent rubber-stamping of impossible-to-validate tests, deadly quackcines, etc. at the FDA is just part of the murderous theatre.

Life in prison!

My affidavit regarding the hundreds of freedom of information responses (FOIs) confirming the fraud and delusion of virology, with German and Greek translations:

Freedom of Information Responses reveal that **health/science institutions around the world (225 and counting!) have no record of SARS-COV-2** (the alleged covid virus) **isolation/purification, anywhere, ever:**

<https://www.fluoridefreepeel.ca/fois-reveal-that-health-science-institutions-around-the-world-have-no-record-of-sars-cov-2-isolation-purification/>

Excel file listing 225 institutions:

FOI responses re other imaginary "viruses" (HIV, avian influenza, HPV, Influenza, Measles, etc., etc., etc.):

<https://www.fluoridefreepeel.ca/fois-reveal-that-health-science-institutions-have-no-record-of-any-virus-having-been-isolated-purified-virology-isnt-a-science/>

FOIs re secretive and unscientifically "mock infected" cells (aka invalid controls) and computer-model "viral genomes":

<https://www.fluoridefreepeel.ca/do-virologists-perform-valid-control-experiments-is-virology-a-science/>

3000+ pages of "virus" FOIs in 8 compilation pdfs, and my **notarized declarations** re the anti-scientific nature of virology:

Failed freedom of Information responses re contagion:

<https://www.fluoridefreepeel.ca/freedom-of-information-responses-re-contagion/>

Do health and science institutions have **studies proving that bacteria CAUSE disease?**

<https://www.fluoridefreepeel.ca/do-health-authorities-have-studies-proving-that-bacteria-cause-disease-lets-find-out-via-freedom-of-information/>

Because "they" (HIV, influenza virus, HPV, measles virus, etc., etc., etc.) have never been shown to exist, clearly don't exist and virology isn't a science.

For truth, freedom and sanity,

Christine
