To All Whom the Presents May Come:

Once again, Environment & Climate Change Canada (ECCC) has failed my official legal challenge to show that the institution has valid scientific evidence to support their "avian influenza" narratives and activities... despite being a member of Canada's "**Highly Pathogenic Avian Influenza Vaccination Task Force**" and claiming to conduct "**surveillance**" for "**avian influenza virus**" 🤪.

Previously, on October 10, 2025, more than 5 months after acknowledging my legal challenge and more than a month after its own extended deadline had passed, I reported [here](#) on the agency's ongoing failure to even respond, let alone provide or cite any studies that satisfy my freedom of information order ([pgs 1/2](#)) for foundational evidence.

Since then, I have received another unsigned response letter from Susan Drysdale acting as Director, Access to Information and Privacy ([pgs 14-17](#)). Along with this letter, dated October 21, 2025, Susan provided a "complete release package" and a Word document containing a "list of publications" ([pgs 18-101](#)).

Attached please find the [complete release package](#) in response to this request. Also note that we have attached a word document with a [list of publications](#) as per your request.

Let's take a look at Susan's "complete release package" and see if it contains any studies that match my order. First, we'll need a quick review of what I ordered:

All **studies** in ECCC's possession, custody or control, **authored by anyone, anywhere**:

- that scientifically prove or provide evidence of the existence of the alleged avian influenza virus, or
- that at least describe purification of particles *thought* to be avian influenza virus directly from bodily fluid/tissue of "hosts" (so that they could later be sequenced, characterized and studied with valid, rigorous scientific experiments), or
- wherein the purported "genome" of any alleged avian influenza virus was found intact in the bodily fluid or tissue of a "host" (not merely computer-modelled), or
- that scientifically demonstrate contagion of so-called "avian influenza" illness / symptoms, or
- wherein any test that purportedly relates to the alleged avian influenza virus was validated.

Now for the "complete release package":

On pages 000001 - 000053, we find the "Genomics R & D Initiative Annual Performance Report 2016-2017", published by "Government of Canada" ([pgs 18-70](#)). An annual performance report is obviously not a study showing the existence of a

virus, a "genome", purified particles, contagion or validation of tests and is therefore irrelevant to my order.

On pages 000054 - 000080 of the package is a 2025 "Science Roadmap and Action Plan" on "Managing Avian Flu" from "the Chief Science Advisor of Canada" (pgs 71-97). An action plan is also not a study, so it too is irrelevant and distracts from what I actually ordered.

On the final 2 pages of the package (000081, 000082) (pgs 98-99) are excerpts from my order along with citations of supposedly responsive/relevant studies. These are the same studies that are cited in the Word document provided by Susan (pgs 100-101) and thus these are the *only* studies cited by ECCC. **ZERO studies have been provided.**

The citations are grouped under the parts of my order to which they supposedly relate. For the first 2 parts of my order, for studies that scientifically prove or provide evidence of the existence of the alleged virus or that at least describe the essential foundational step: purification of particles suspected of being a virus directly from bodily fluid or tissue, **ZERO studies are cited.**

This is an indirect "no scientific evidence of a virus" official legal confession.

Under the 3rd part of my order, for studies wherein the purported "genome" of the alleged avian influenza virus was found intact in bodily fluid or tissue, 2 unhelpful records are cited.

WLSD records identified as related to file A-2025-00030 under the *Access to Information Act* (the Act) for the following request:

"All studies in the possession/custody/control of "Environment and Climate Change Canada", authored by anyone, anywhere:

1) that scientifically prove/provide evidence of the existence of the alleged "avian influenza virus" (showing that the alleged particles exist, invade and replicate in "host" cells and cause the illness/symptoms that they are alleged to cause), or;

NO STUDIES CITED

2) (if no records exist for #1) that at least describe the purification of particles that are alleged to be "avian influenza virus" directly from bodily fluid/tissue/excrement of so-called "hosts", with purification confirmed via EM imaging, or;

NO STUDIES CITED

3) wherein the purported "genome" of any alleged "avian influenza virus" was found intact in the bodily fluid/tissue/excrement of a "host" (as opposed to fabricated in silico aka a mere made-up computer model), or;

- Seyer, Y., Guillemette, M. 2023. Situation of the Northern Gannet colony of Bonaventure Island (QC) following the outbreak of highly pathogenic avian influenza (HPAI) virus in the spring of 2022 in eastern Canada. [CWS Unpublished contract report that would be in their holdings]
- Giacinti, J. A., A. V. Signore, M. E. B. Jones, L. Bourque, S. Lair, C. Jardine, B. Stevens, T. Bollinger, D. Goldsmith, B. C. W. A. S. P. (BC WASPs), M. Pybus, I. Stasiak, R. Davis, N. Pople, L. Nituch, R. W. Brook, D. Ojkic, A. Massé, G. Dimitri-Masson, G. J. Parsons, M. Baker, C. Yason, J. Harms, N. Jutha, J. Neely, Y. Berhane, O. Lung, S. K. French, L. Myers, J. F. Provencher, S. Avery-Gomm, G. J. Robertson, T. Barychka*, K. E. B. Gurney, J. Wight, I. Rahman, K. Hargan, A. S. Lang, M. G. C. Brown, C. Pekarik, T. Thompson, A. McLaughlin, M. Willie, L. Wilson, S. A. Flemming, M. V. Ross, J. Leafloor, F. Baldwin, C. Sharp, H. Lewis, M. Beaumont, A. Hanson, R. A. Ronconi, E. Reed, M. Campbell, M. Saunders, and C. Soos. 2024. Avian influenza viruses in wild birds in Canada following incursions of highly pathogenic H5N1 virus from Eurasia in 2021/2022. *mBio*, e03203-23. [10.1128/mbio.03203-23](https://doi.org/10.1128/mbio.03203-23)

4) that scientifically demonstrate contagion of the illness / symptoms that are

As shown above, the first (alleged) study is (allegedly) titled "Situation of the Northern Gannet colony of Bonaventure Island (QC) following the outbreak of highly pathogenic avian influenza (HPAI) virus in the spring of 2022 in eastern Canada", by Seyer, Y. and Guillemette, M. (2023). It is described as: "**CWS Unpublished contract report that would be in their holdings**".

Apparently this alleged report is not even held by ECCC, it is only with "CWS" (whatever that is). I cannot find any trace of it online. There isn't any way for anyone at ECCC to have verified that Seyer and Guillemette actually found the purported "genome" intact in bodily fluid or tissue if only "CWS" has the alleged report.

(Even IF Seyer and Guillemette had found the alleged "genome" intact - which no one else has done and which I am confident is not the case - this would **not** establish that the provenance is an imagined virus and it would **not** establish contagion of anything.)

ECCC's citation of this *alleged* study is smoke and mirrors, a distraction from their inability to provide or cite any verifiable record matching my order.

The 2nd study cited in the "intact genome" section is a 2024 "Editor's Pick" by Giacinti et al., **published** in mBio. The authors took swabs from carcasses of wild birds and added "appropriate transport medium" - meaning that they likely contaminated the swabs with fetal bovine serum and toxic chemicals, etc. (see [here](#) and [here](#)) - and then stored the swabs between -20 and -80°C (which couldn't possibly affect the contents, lol). Later, the likely-contaminated swabs were tested with tests that don't test for a virus.

Laboratory analyses

Real-time reverse transcriptase polymerase chain reaction (RT-PCR) testing of swab samples and tissue samples was performed at the diagnostic laboratories of the Canadian Animal Health Surveillance Network (CAHSN), which is a network of federal,

The authors then imaginarily "isolated" the imaginary viruses from samples that tested "positive" on the tests that don't test for a virus by... get this... adding the samples to embryonated chicken eggs (**as do the "experts"** at the "World Organization for Animal Health" and the U.S. Department of Agriculture). Because in virology, mixing complex substances together and blaming observed effects on an imaginary virus = "isolation". Because virology isn't a science.

completed. Virus isolation was attempted on most H5-positive samples at NCFAD-CFIA. Virus isolation was conducted in 9-to-11-day-old, specific pathogen-free embryonated chicken eggs; in some cases, the samples were negative, and in a few cases, testing

"Full genome segments" (more accurately known as: "sequences smaller than the imaginary genome and of unknown origin") that were detected in clinical specimens or "isolates" (egg/swab mixtures), **not in purified samples of suspected viruses**, were then **assembled in silico** (computer-modelled) into fake/fraudulent and meaningless "genomes":

Influenza virus genome sequencing and assembly

AIV full genome **segments** were amplified either directly from clinical specimens or isolates as described previously (18). High-throughput sequencing was performed either on an Oxford Nanopore Technologies (ONT) GridION sequencer and R9.4.1 Flow Cell following library ($n = 921$) construction using the ONT Rapid Barcoding Kit (SQK-RBK004 or SQK-RBK110.96) or an Illumina MiSeq ($n = 257$) using the Nextera XT Library Preparation kit (Illumina) following the manufacturer's protocol. The Hamilton Microlab Star Robot was used for Illumina library preparation prior to sequencing with Illumina MiSeq Reagent Kits (300 cycles or 600 cycles) paired with either Illumina MiSeq V2 or V3 Flow Cells. The raw Nanopore signal data were basecalled and demultiplexed with the latest version of Guppy at the time of sequencing (version 5.0.17–version 6.5.7) using the high-accuracy or super-high accuracy models.

Basecalled Nanopore reads were analyzed and assembled with the CFIA-NCFAD/nf-flu version 3.3.6 Nextflow workflow (19, 20), which ran IRMA (version 1.0.2) for initial genome **assembly** (21); nucleotide BLAST version 2.14 (22, 23) search of IRMA **assembled genome segment** sequences against all Orthomyxoviridae sequences from the NCBI FTP site (<https://ftp.ncbi.nlm.nih.gov/genomes/Viruses/AllNucleotide/>; 1,070,105 sequences downloaded 14 June 2023); selection of appropriate reference sequence for each genome segment and H/N subtype prediction based on nucleotide BLAST

The results of this super-science endeavor were then uploaded to GISAID:

analyses. All viral genome sequences reported in this study will be made available on the GISAID database under the NCFAD account. Details regarding the submission process

Back to the final 2 pages of Susan's "complete release package". Under the 4th part of my order, which is for studies that scientifically demonstrate contagion of the (non-specific) so-called "avian influenza" illness / symptoms, 5 studies are cited. The first is the same possibly-non-existent study that was already discussed under the "genome" section above and described by ECCC as an "CWS Unpublished contract report".

The 4 remaining supposedly-scientific studies showing contagion are [here](#) (Cormier et al., 2024), [here](#) (McPhail et al., 2024), [here](#) (Avery-Gomm et al., 2022) and [here](#) (Lane et al., 2023). I invite everyone to review them and to notice that

some of the citations are botched in terms of the journal name or page numbers. "AI" is well-known for making-up citations, so no surprise there 😊.

But more importantly: **none of these studies are experimental in design**... while the scientific method requires falsifiable hypotheses to be tested via valid rigorous controlled **experiments**. Thus, **none of these studies are scientific**. None of them contain scientific evidence that the presence of sick birds makes healthy birds sick, or that the imagined virus has been transmitted from one bird to another, directly or indirectly.

Instead, invalid, indirect tests relating to the imaginary health threat were implemented in wildly unscientific settings, combined with wild leaps of illogic, and misinterpreted by study authors and/or whoever came up with ECCC's list of studies to falsely (re)affirm that "bird flu" is the reason birds have died and is a contagious illness.

Lane et al. appear especially determined to convince everyone of "HPAIV spread"... based on their improper use of unsubstantiated propaganda in their Methods section.

Once again, the real cause(s) of illness and death are off the hook. The "germ" delusion has worked its magic, once again.

High pathogenicity avian influenza (H5N1) in Northern Gannets (*Morus bassanus*): Global spread, clinical signs and demographic consequences

JUDE V. LANE,*¹ JANA W.E. JEGLINSKI,² STEPHANIE AVERY-GOMM,³ EMAD BALLOUTAJE,⁴ AILEY C. BANNARD,⁵ TATSIANA BABYCHKA,³ JANU L. BROWN,⁵

METHODS

Global context: HPAIV spread across the North Atlantic Gannet meta-population

To create an overview of the occurrence and spread of HPAIV across the Gannet meta-population (as

For the 5th part of my order, which is for studies wherein any test that purportedly relates to the alleged avian influenza virus was validated, of course **ZERO studies are cited**.

In summary: no records!

In summary, Susan Drysdale has confirmed and confessed that Environment & Climate Hoax Change Canada has **ZERO studies** containing scientific evidence of the imagined avian influenza virus or showing validation of a test for the imagined virus... or even describing the necessary foundational step of finding and purifying particles from "hosts" in order for them to be sequenced, characterized and studied with valid controlled experiments.

Susan Drysdale, acting for Environment & Climate Change Canada, also failed to provide or cite even 1 study that scientifically demonstrates contagion of the *nonspecific, so-called* "avian influenza" illness/symptoms.

And, Susan Drysdale, acting for Environment & Climate Change Canada, failed to provide or cite even 1 verifiable study wherein the imagined "genome" of the imagined virus was found intact in a so-called "host".

What is passed off as "avian influenza" is **not even a distinct illness** and the entire "bird flu" narrative is a sick and deadly criminal HOAX used to terrorize farmers, kill birds and attack the food supply. Life in prison for the perps.

For many more official "bird flu" legal confessions and failures, an important resource for farmers, educational materials on this hoax and on alleged "antibodies", see **Don't fall for the "avian influenza virus" hoax!**

Do health and science institutions have **studies proving that bacteria CAUSE disease?**

<https://www.fluoridefreepeel.ca/do-health-authorities-have-studies-proving-that-bacteria-cause-disease-lets-find-out-via-freedom-of-information/>

Because "they" don't exist and virology isn't a science.
